

17 Reasons why Carico's Cutlery Collection is the Finest Cutlery in the Industry

1. Each knife is made from a single block of high carbon, stain resistant, surgical steel alloy
2. Each blade is fully forged and goes through a 22 step process.
3. The knives have an exceptional hardness, but not too hard, which would make them hard to sharpen, nor too soft which would make them brittle.
4. The edges of our knives are precision grounded for maximum strength, tapered and then laser tested to insure a cutting edge that is unrivaled.
5. The edges of our knives are hand-honed to give a professional cutting edge.
6. Our blade, designed with the double V connection is permanently embedded in poly oxy methylene.
7. Poly oxy methylene is a tough, solvent and fuel resistant plastic, making the handles of our knives extremely durable; they are seamless.
8. Our handles are gracefully sculptured providing the safest and surest grip.
9. Each of our knives has a bolster designed to protect your hands when cutting.
10. Our blades and handles are tested under 1,000 pounds of pressure to insure they will never separate.
11. Our collection of knife sets insures that you will always have the right knife within reach.
12. We also offer in our Knife Collection the finest **"hard wood"** blocks and cutting boards.
13. All of our cutlery sets come beautifully gift boxed.
14. In our Cutlery Collection, we offer a 6 piece Kitchen Tool set, in a gift box.
15. We also offer the finest Kitchen Shears in a Gift Box.
16. For those who enjoy fish, they will greatly appreciate our Fish Fillet knife with its own protective sleeve.
17. A cutlery collection would not be complete unless it has Carico's 8 piece Steak knife set, including the "hard wood" block.
