
DEEP RESTFUL
SLEEP

A good night’s sleep is
critical when it comes
to good health.

Without deep sleep, your body can’t rebuild or rejuvenate properly.

You become:

- Irritable
- Moody
- Can’t focus
- And miserable all day

Dr. Neil B. Kavey, Director of Sleep Disorders at Columbia Medical Center found:

“Sleep restores the body, muscle tissue is rebuilt and restored, it restores mental energy, affects our personalities and our sense of humor, affects our thinking, affects us physically, improves muscle tone and skin appearances”.

Do you sometimes wake up in the morning feeling...

- Stiff and sore
- Tired and irritable
- Congested
- Your eyes irritated

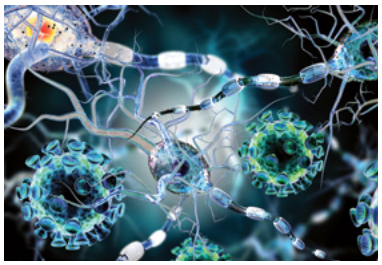

The reason could be your mattress is:

- Not providing proper orthopedic support.
- Causing pressure points that make you toss and turn.

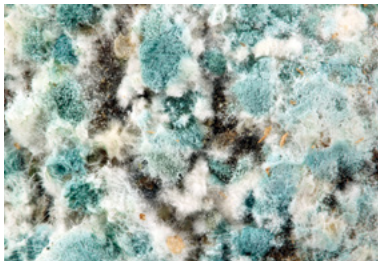

THE Better Sleep COUNCIL

recommends replacing your mattress every 5-7 years because your old mattress becomes weighted down from years of accumulated:

Bacteria

Mold

Dust Mites/ Fecal Matter

(100,000 to 10 million inside)

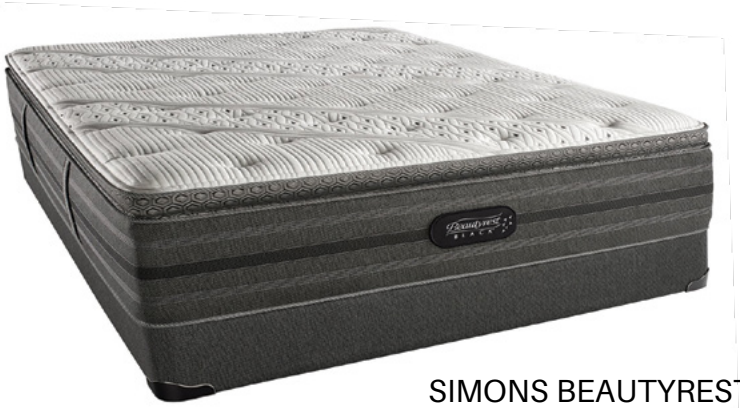

Which may cause allergies, headaches and congestion!

You spend one third of your life in bed. Choosing the right mattress is vital to deep restful sleep.

So what are your options?
